

CASIO®

TE-2200

Simple, yet powerful scanning
cash register to help you
manage your business
transactions

www.casio.co.uk/systems

CASIO®

The CASIO TE-2200 features a raised keyboard, high speed dual printers, barcode scanning and a bright customer display making it ideal for fast sale processing in a retail environment.

CASIO® TE-2200

Receipt and journal printer

The TE-2200 features two fast, 58mm wide thermal printers. Printing speeds of 14 lines per second mean your customers will receive their receipts quickly. And to give your business a professional appearance, graphic logos and watermarks can also be printed. With easy drop-in

paper loading for simple paper roll replacement, the TE-2200 ensures fast and efficient operation.

Barcode scanning

The TE-2200 can be used in conjunction with a barcode scanner to improve the efficiency of your business. This function allows up to 5000 products to be scanned into the cash register, ensuring that products are sold at the correct price and eliminating the need to manually enter prices. Scanning a products' barcode at the point of sale, allows you to use shelf edge labels to indicate product pricing, eliminating the need for staff to individually price each item.

Display

The TE-2200 features a bright, contrast adjustable 5.2-inch LCD operator display with 2 x 16 character lines to display product details and a 7 digit display for product price. This means your staff can easily see the details of the items they are selling to ensure accuracy. A standard pop-up rear display ensures your customers can see the price they are paying, giving them peace of mind.

Help function

The TE-2200 is simple to operate, however there is also a user friendly "HELP" button on the keyboard. Answers to frequently asked questions such as how to programme the time and date can be printed on the receipt printer for easy reference.

Peripherals

For maximum flexibility, the TE-2200 features two serial ports for direct connection to PC, modem for connecting to head office, external remote printer, slip printer for printing guest receipts or validation and scanner for barcode reading.

Reports and useful functions

Daily reports can be printed on the TE-2200 using compressed printing. Other useful functions include clerk interrupt, scheduler function, set menu function, arrangement function and memory allocation.
