

How to add a Dallas I-Key

This Information is used if you use Dallas I-Keys to log on to your Cash Register.

To set the I-Key, you must access the employee folder (System Set Up, then POS Control Data).

Click on the employee as requires and then select set 'Set I-key' on the left, follow the on-screen instructions exactly.

N.B. You can only add one Dallas I-Key at a time. After each I-Key has been added, you must exit the back office software and test by logging on to the cash register.
