

How to add a Recipe for a bulk Item

The example

- 1 tin of food has a barcode of 50001234
- A case of 12 of the above food, has a case barcode of 50001555

The goal

- When you scan 50001234 this will sell 1 can
- When you scan 50001555 (or press this button on a menu) it will sell 1 case, but down date the stock of 12 tins of 50001234

Requirements

- Setup item 50001234 in the items file with the cost for one can and the sales price for one can. Stock unit of measure can be Each or Case 01
- Setup item 50001555 in the items file with the cost for one case and the sales price for one case. Stock unit of measure can be Each or Case 01

Recipe

- Under 'System Setup' and then 'PLU/Item management' go to 'PLU/Item management' and then 'Stock Control'. Click on recipes (middle left). Find the record for the case item 50001234
- Click on 'Add item' and add 50001234 with a qty of 12.

N.B. When ordering and receiving goods and making adjustments do so against the can item 50001234
