

How to Add the Windows Calculator

To add the Windows calculator (as an external program) you need to do the following in the back office:

1. Add a new department called External Program - To do this go to System Setup, PLU/Item management, Departments. Add a new record with an identifier of External Program and a level of 2. Click on Data and then save record on the pull down menus to save.

2. Add a new item, it will have the following characteristics:

Long Desc	c:\winnt\system32\
Description	calc.exe
Department1	Manager
Department2	External program
Hotkey Line1	calc
Hotkey Line2	ulator

Click on Data and then save record on the pull down menus to save.

3. Add the new item to a menu button on the till. To do this, go to System Setup, PLU/Item management, Item Keys. Click on Hot keys (bottom left of screen), choose menu to add the item to and click on. Select Add and add the calculator item
