

Visa Europe Account Information Security (AIS)

List of PCI DSS validated service providers

Effective 1 October 2009

The companies listed below successfully completed an assessment based on the Payment Card Industry Data Security Standard (PCI DSS).¹

The validation date is when the service provider was last validated. PCI DSS assessments are valid for one year, with the next annual report due one year from the validation date. Reports that are 1 to 60 days late are noted in **orange**, and reports that are 61 to 90 days late are noted in **red**. Entities with reports over 90 days past due are removed from the list.

It is the member's responsibility to use compliant service providers and to follow up with service providers if there are any questions about their validation status.

¹ A PCI DSS assessment only represents a 'snapshot' of the security in place at the time of the review, and does not guarantee that those security controls remain in place after the review is complete. These reviews do not cover proprietary software solutions that may be used or sold by these service providers.

Inclusion on this list indicates that the service provider successfully completed a PCI DSS assessment following requirements prescribed for their level, based on the report of an independent Qualified Security Assessor (QSA). Visa does not endorse the service providers or their business processes or practices.

Visa Europe has no duty to members, merchants, processors or other third parties to obtain or review reports from any party required to submit a report, and Visa Europe is not responsible to any party for the timeliness, accuracy or completeness of any report. Visa Europe reserves the right to remove a service provider from this list should there be any questions relating to their PCI DSS compliance.

² The service provider may have validated PCI DSS compliance in the year prior to the validation date stated.
